

PITCH BLACK, NOW IN FULL COLOUR

SEE AT NIGHT WITH FLIR COLOUR THERMAL VISION AND AXIOM®

Night-time navigation is now safer with the M300 Series and Raymarine Axiom. FLIR thermal technology with Colour Thermal Vision (CTV) captures the power to see clearly in total darkness, glaring light, and light fog. True technology, FLIR cameras are used by thousands of military, first responders, and commercial professionals every day for navigation, collision avoidance, threat detection, and search and rescue missions.
